Q) write an application to read the date in below format.
   dd/mm/yy
   dd/m/yyyy
   dd/m/yy

  if it does not follow the above format , raise WrongDateFormatException as below mentioned output

   input : 24/03/18
   output : fine

   input : 03/24/18
   output : Wrong date format as 03/24/18 should be in dd/mm/yyyy or dd/m/yyyy

  input : 24/march/2018
  output : Wrong date format as 03/24/18 should be in dd/mm/yyyy or dd/m/yyyy and month should not be in text format.

  and if date if future date raise NotAValidDateException.

  input : 24/3/2020
  output : NotAValidDateException.

  Note : NotAValidDateException is a child of WrongDateFormatException.
